

ABOUT

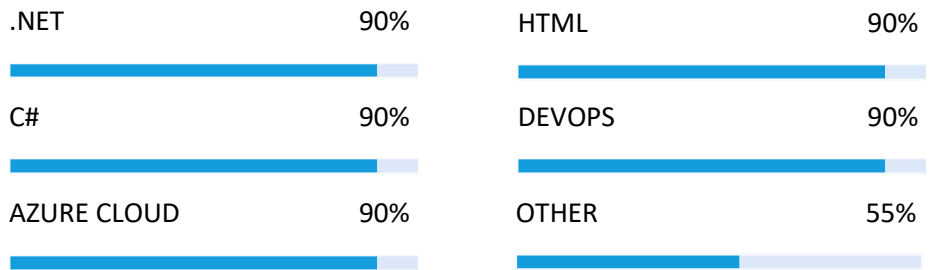

Born and raised in Copenhagen, Denmark in the year of 1975. Passionate about coding and in love with entrepreneurship.

I have been working with software development since year 2000 and have now accumulated 23 years of experience mainly in the Microsoft technologies of .NET, C# and Azure Cloud Tech.

In 2016 I created my own software development company in Morocco which is working mainly with software development for European and Scandinavian companies.

SKILLS

When is it a valid postulate to say that you master a development technology 100%. I would say never. The development world is in constant change, and it is "impossible" (at least for me) to master these skills 100%. But hey we now have ChatGPT ...

RESUME

Starting my first coding on a Commodore 64 with a cassette drive should point you in the direction when trying to understand who I am. Since then, the keyboard has been my friend and soulmate, and even causing dangerous jealousy when caressing it to get things working.

SUMMARY

THAMI NAJIM

Innovative, Passionate and Punctual Software Developer, with more human touch than most developers. Taking great pride in delivering Software that can easily be overtaken with top readability and maintainability.

EXPERIENCE (PERSONAL)

2010 - 2015

SOFTWARE DEVELOPER CONSULTANT

TeraByte, Kenitra, MOR

- Module and plugin development for Wordpress, Joomla and Magento as a personal outsourced freelance backend developer for multiple danish cms- and website providers.
- Html, PHP, JavaScript, MySQL.

2006 - 2010

SOFTWARE DEVELOPER CONSULTANT

Barker Jørgensen A/S (TSM), Copenhagen, DK

- International multilingual system which generates technical calculated specifications and creates AutoCAD sketches for the production of industrial ventilators. The system also generates workflow sheets for the productionsites with scanner codes for each factory process. Finally the system creates cargo cover letters and accounting specific invoices.
- Html, .Net, C#, JavaScript, Windows SQL Server, Stored Procedures.

2005

SOFTWARE DEVELOPER CONSULTANT

Courseware, Copenhagen, DK

- Working on E-Learning migration for Danske Bank and National Irish Bank and Northern Bank. As a result of the merging between these banks a complete E-Learning system was created with interactive learning with drag-and-drop answers and multi-choice answers to educate employees in the usage of the banking-system.
- Html, JavaScript, Windows SQL Server

1998 - 2003

SOFTWARE DEVELOPER CONSULTANT

Radisson SAS Hotels IT-Department, Copenhagen, DK

- Systemmanager, intranetdevelopment and programming of applications.
- Support, service and development on hotel management system used by the five danish Radisson SAS hotels
- Unix, SQL, Windows Server, Windows SQL Server, Asp 3.0, Html, JavaScript.

EXPERIENCE (TERABYTE SOFTWARE)

2016 - 2023

SOFTWARE DEVELOPMENT

EnviDan, Silkeborg, DK

- Support and development of the EnviDan application portal spanning multiple products and technologies.
- Planned and executed migration from monolith architecture to microservices on a 20+ year old legacy codebase.
- Development of new applications and upgrading existing applications to newer front- and backend technologies.

2020 - ongoing

SOFTWARE DEVELOPMENT

InsightsRadar APS, Copenhagen, DK

- InsightsRadar is an enablement and empowerment solution, providing sales and delivery with unique customer data and insights.
- InsightsRadar GAP Assessments enables companies to be more data-driven in stakeholder management, and to handle far more stakeholders and influencers.
- InsightsRadar Partnering enables worldwide collaboration between main companies and its subsidiaries sharing gained knowledge in a secure GDPR compliant way.

2022 - ongoing

SOFTWARE DEVELOPMENT

Eco-Capture, Singapore, SG

- Development of an SaaS data capturing tool that collects data within ESG, UN SDG, RISK and PROCUREMENT. Ground-breaking efficient data-capturing and collaborative SaaS platform for impactful and informed decisions across the entire supply chain.
- Part of the modular Eco-Cure platform including modules for data-treatment, AI and Eco-Market with the attention of multiple FT Global 500 companies and with a pending B Corp.

2023 - ongoing

SOFTWARE DEVELOPMENT

Momentum, Oslo, NO

- Support and development on Norwegian management system.
